## VIRTUOZZO VPS PRODUCT SHEET

Update: 12.01.2014  
Version 1.00

## 1. Solutions benefits

### 1.1. For the customer

#### 1.1.1. General information

When a website is growing in size, importance and traffic Virtuozzo VPS is the perfect reliable and cost effective solution. No need for an expensive dedicated server, Virtuozzo VPS makes use of the most advanced technology (Parallels Virtuozzo) to give your website the security and the dedication of a dedicated server but without the high costs and hassle to set it up.

### 1.1.2. Features

#### **On-the-fly start, stop & reboot**

Get control over a VPS container through any browser and Internet connection.

#### **Manage VPS system services**

System services and processes can be stopped or restarted at any time through the web portal.

#### **Embedded SSH**

Connect via SSH to your VPS through your browser.

#### **Complete backup / restore**

Backup and restore your entire container at any time with a single click.

#### **VPS repair, reinstall & action logs**

Modes and logs used to automatically assist you when things have gone wrong.

#### **Resource monitoring**

Monitor CPU, RAM, disk space and nodes utilization and capacities.

## 1.2. For the Sales Partner

### 1.2.1. General information

Virtuozzo VPS is designed for those that have outgrown Shared Web Hosting but don't require the resource intensive features of a dedicated server or Hypervisor VDS (Virtual Dedicated Server). Virtuozzo offers the perfect balance of cost effectiveness with flexibility, control and performance.

When it comes to virtualization technologies, there is one virtualization platform that clearly stands out; Virtuozzo VPS allows multiple Linux distributions to be hosted on one physical server. Virtuozzo VPS also has an excellent user interface, which allows for easy administration of multiple servers within one easy-to-use web interface.

With Virtuozzo VPS you can offer your customers an upgrade path from Shared Web Hosting to a state of the art virtualization platform. More and more customers rely on their website for their business. It is essential the technology hosting it match their needs for security and dedication; Virtuozzo VPS does just that and at a reasonable price

Virtuozzo VPS also brings multiple benefits that you generally wouldn't see on other virtualization platforms such as; superior documentation; excellent support; and most importantly swift security patches. Virtuozzo for Linux is constantly being developed and passes stringent quality control testing prior to any releases.

The screenshot shows the Parallels Infrastructure Manager interface. The top navigation bar includes the Parallels logo and the text 'Infrastructure Manager'. On the right, there is a 'Container vps.demo.com' status indicator. The main interface is divided into several sections:

- Container Management:** A sidebar menu with options: Change Password, File Manager, Maintenance, Resources, Applications, Packages, and **Control Panels** (highlighted with a red box).
- Container Services:** A sidebar menu with options: System Services, System Processes, Firewall, and SSH Connection.
- Logs:** A sidebar menu with options: Status Changes, Resource Alerts, Tasks Log, and Traffic Log.
- Other:** A sidebar menu with options: Help and Preferences.
- Desktop:** A central area with a 'Desktop' header, a 'Welcome to Parallels Power Panel.' message, a 'Memo' section, and an 'Actions' section with buttons for 'Change Password' and 'Manage File Manager'.
- Resources:** A section showing 'Container #1020' with a 'Running' status and '2% Space Used'. It includes sub-sections for 'CPU Usage', 'Memory Usage', 'Disk Usage', and 'Network Usage', each with a table of metrics.

CPU	0.00%
Load Average	0.0, 0.0, 0.0

Resource	Used	Free	Total
Memory	47.3 MB (9.23%)	464.7 MB	512 MB

Resource	Used	Free	Total
Disk Space	199.16 MB (1.94%)	9.81 GB	10.00 GB
Disk Inodes	29,797 (2.98%)	970,203	1,000,000

Class ID	Bandwidth
1	0.00%

### 1.2.2. Features

#### **Reduce costs**

With Virtuozzo VPS we provide you with an end-user solution that reduces costs and ensures the best return on investment possible for your customers. With Virtuozzo Virtualization, you will lower your total cost of ownership.

#### **Increase availability of services**

The greater security and reliability of Virtuozzo VPS, increase in return the availability of your services, thereby increasing end user satisfaction.

#### **Improve business agility**

Our Virtual Private Servers help your business become more flexible and adaptable. You can provide your customers with the IT resources their organization needs and improve business agility for your end-user.

### 1.2.3. Target market and potential customers

The Virtuozzo VPS users enjoy independent management over their machines that are safeguarded by root level security passwords known only to them.

#### The ideal VPS user profile

- Consists of decentralized businesses (multiple offices, home offices, traveling sales staff)
- Has established websites, and/or online e-commerce businesses
- Is committed to hosting and subscription-based pricing model
- Wants to pay monthly, not buy a complete dedicated solution
- Is looking for clear terms of service and SLA based model
- Demands excellent server performance and reliability
- Desires to outsource IT administration, maintenance and management (system administration, security expertise, etc.)
- Wants strong customer support on their servers and websites
- Is looking for a partnership (not just a vendor relationship)
- Is willing to pay for value
