## OPEN-XCHANGE PRODUCT SHEET

Update: 27.04.2015  
Version 1.2

## 1. Solutions benefits

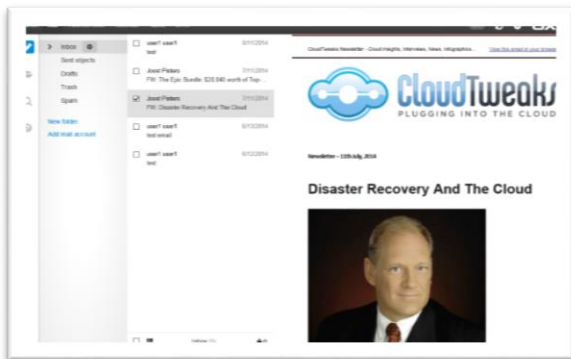

### 1.1. For the customer

#### 1.1.1. General benefits

Open-Xchange is a great alternative to Microsoft Exchange that equips users with a highly advanced and intuitive browser based interface meeting all their needs for email, calendar, tasks management, contacts and document storage. It also offers basic document management and sharing, and permits full synchronization of calendar, tasks, shared folders, distributions lists and address books. It is a smart collaboration solution with outstanding scalability and performance.

#### 1.1.2. Features

- **Manage emails, calendars and contacts anywhere**

Managing emails, calendars and contacts is really simple with Open-Xchange. Common tasks such as receiving, sending emails, creating appointments and managing address book contacts take place in one user interface (UI).

This enables users to work anywhere in the world from any device that can connect to the internet.

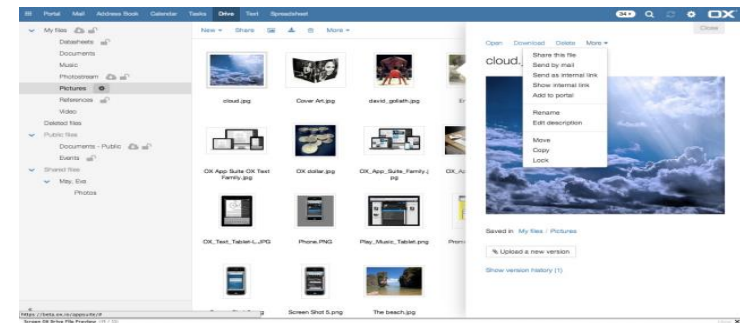

- **Connect with all sorts of mobile devices**

Open-Xchange professional supports all major mobile operating systems including iOS, Windows Mobile, Android and Blackberry. Users can access their email, organize meetings and tasks, accept invitations and manage contacts from their mobile devices.

- **OX Drive – access all your files online**

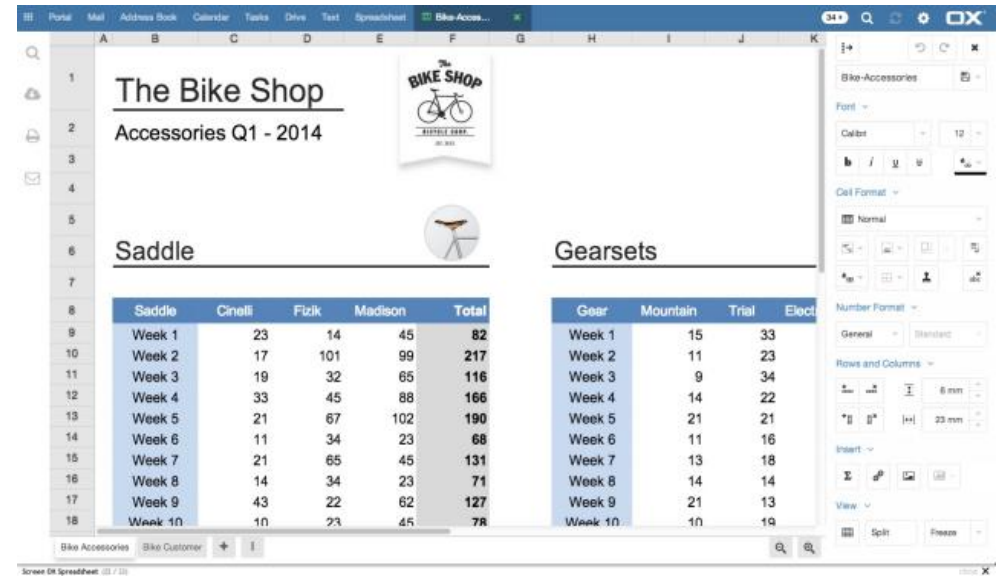

The OX Drive is an online repository for all your files. This utility enables users to access the latest version of their files from any device anywhere in the world. It also makes it possible to work in collaboration with other Open-Xchange professional users - for example colleagues, clients, friends and family.

- **OX Text – a cloud-based word processing solution**

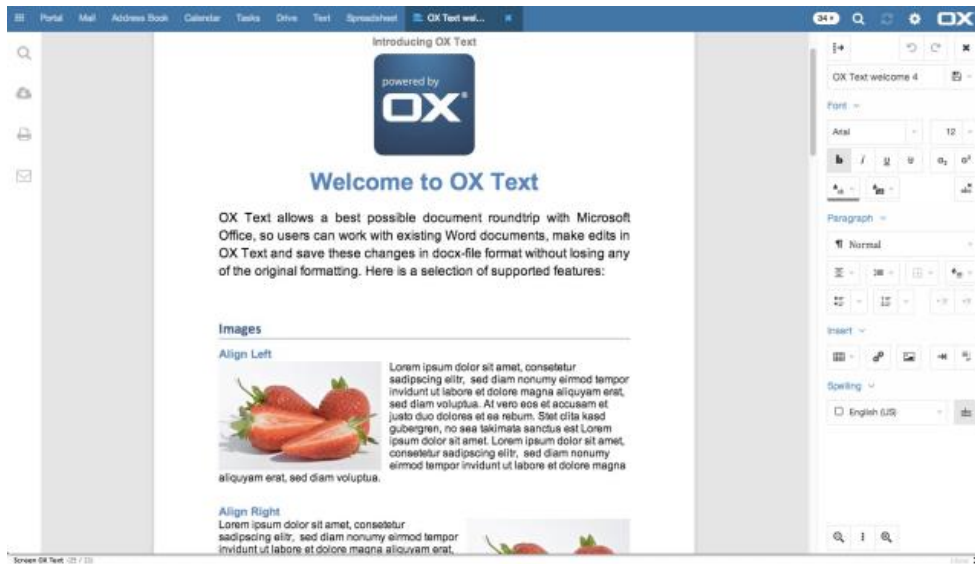

OX Text is a text editor which enables web-based, collaborative word processing. Uniquely OX Text provides a seamless document Round-trip. It is compatible with MS Office and OpenOffice.

- Online word processing
- More efficient collaboration
- Reduced complexity
- Increased productivity
- Anytime, anywhere access
- Compatible with Microsoft Office and OpenOffice
- Lower software licensing costs

- **OX Spreadsheet – a cloud-based spreadsheet solution**

Creating spreadsheets, calculating formulas and editing tables have been day-to-day business asks for many years. But in today's anywhere, anytime world, teams are distributed around the globe and based outside of the traditional office environment. So how can you ensure that they can work efficiently and collaboratively on these files? Enter OX Spreadsheet, the cloud-based application that lets users edit and share content – wherever they are.

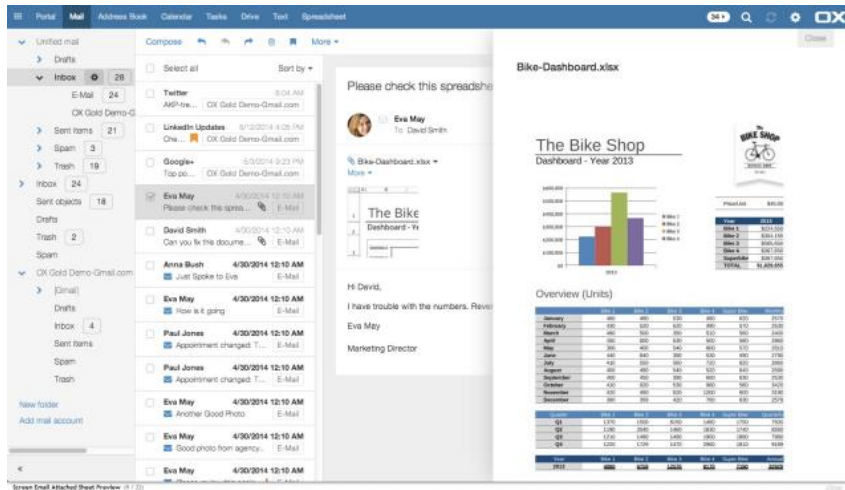

## 1.2 For the sales partner

### 1.2.1 General information

Open-Xchange is collaboration software designed for professionals and businesses who want to add different email accounts, share calendars, contacts, tasks and files, and synchronize all these applications and social media to their smart-phone. Add this service to your product range and help your business stand out from the competition.

With Open-Xchange, your customers will benefit from an efficient working environment that is accessible on all the popular devices, anywhere in the world and for an affordable price.

Even more, Open-Xchange has a relatively easy integration and installation process. No migration of mail-accounts is needed, saving you time and money; all you need is a simple connection through IMAP.

### 1.2.2 Target market and potential customers

The target market for Open-Xchange includes small to medium-sized businesses (SMBs) and small office/home office (SOHO). With tools for flexible business modeling, you can offer a broad range of services that goes from basic email up to higher value services such as providing additional storage, hosting personal domains and calendars.

Open-Xchange is the perfect tool for small and medium sized businesses that are looking for an alternative collaboration solution. It is the Ideal solution to work in collaboration with colleagues, customers and partners anywhere in the world.

#### The ideal Open-Xchange customer profile

- Includes businesses currently running in-house Exchange 5.5/2003/2007/2010
- Consists of smaller clients looking to provide enterprise-grade functionalities
- Committed to hosting and subscription-based pricing model
- Wants to pay monthly, not buy a complete on-premises exchange solution
- Looking for reporting and analytics as well as on-demand access to information
- Interested in strong customer support
- Wishing for partnership and not just a vendor relationship
- Is willing to pay for value
